**“Financial literacy ranges from a unique array of situations and concepts...it means prioritizing long-term needs and goals over short-term wants.”**

**“My financial goal in the next ten years is to graduate medical school independent of my parents and without overwhelming financial burdens. My dream is to become a youth sports medicine doctor. I was inspired by one of my youth doctors, who I visited often for my sports injuries. Ever since he changed my life, I was inspired to want to help other people and hopefully make a similar impact in their lives.”**
